

## VAC MEMBERS' SURVEY 2020

### TRACK & FIELD COMPETITION

Please give a Yes/No answer to each question and comments in support of your answer. You could send your responses to each question in an email or you could print off this form, write your responses and send a scan/photograph of it. There is no deadline. Your views are welcome at any time.

Please be realistic with your responses. For example, even if we could organise everything mentioned in these questions, would you plan to come to all the events?

	Question	Response (Y/N)	Comments
1.	Would you like VAC to hold an annual outdoor championship run along traditional lines, with all events on the same day and head to head competition against members in the same age group as you? Note: this is not an option for the indoor championships, because of the expense of holding our own championship.		
2.	Since holding our own VAC championships is increasingly difficult to offer because of the large numbers of technical officials needed, would you be OK with the outdoor championships being part of another event e.g. the South of England Masters championships organised by BMAF?		
3.	Would you be OK to see the championship split into different occasions, with only a few events at each? This might help those wishing to compete in multiple events but equally it might create more clashes with other events as the calendar is so full these days.		
4.	Would you be OK to see your events organised in groups based on predicted performance so that you would be competing against people of similar ability level and not necessarily competing against all those in your age group?		
5.	Would you like to participate in a series of VAC events, for which there would be overall winners in each event per age group at the end of the season?		

6.	Would you like to see performances rated on a percentage age-graded basis and award the medals/trophies to the best performances in your event or in a group of events e.g. all throws, all sprints?		
7.	Would we still need have the annual championship with head-to-head competition if a series of meetings was organised in groups based on a predicted performance?		
8.	Would you be willing to help organise the VAC track & field events?		
9.	Would you like to be trained as a technical official so that you could help officiate at VAC events, when you were not competing? The BMAF offers to fund such training and it is a way for you to give something back to the sport which we all love.		
10.	Would you be more willing to join the Committee or help in other ways, if meetings were virtual i.e. by video conference?		

Although responses to this survey won't be truly anonymous, we have no objection to receiving negative comments as long as they are respectful of any individuals and are made in the spirit of constructive criticism.

I will also undertake to feed back the results of the survey to the VAC Committee and other potential volunteers on an anonymous basis and you can trust me that I won't release your name to anyone if you have made a negative comment.

Regards  
Peter Kennedy  
Veterans AC Membership Secretary
